

Energy Policy

As NEDEX Group;

- **To set targets in line with the policy by our management, with the participation of our employees, to create actions to achieve these targets and to provide the necessary resources,**
- **To follow all laws and regulations related to energy and fulfill their requirements,**
- **To establish effective communication with all stakeholders in order to create common value and beneficial results on issues related to Energy Management,**
- **To use appropriate resources and technologies that will keep energy under control,**
- **To increase energy performance values including energy efficiency and density in all processes,**
- **To ensure efficient use of natural resources and energy, to increase the share of renewable energy resources in energy use,**
- **To reduce energy consumption, to make improvements for continuous development regarding energy efficiency, to follow up on their implementation and results,**
- **To use energy-efficient products to improve energy performance, to purchase services and to carry out or provide relevant design studies,**
- **Continuously improve, document, announce to all units, review and update our Energy Management System,**
- **To contribute to the training of all our employees on energy sensitivity as well as to the awareness of our suppliers, subcontractors, visitors and the local community,**
- **To continue our work in cooperation with our stakeholders, suppliers, subcontractors and all our employees in line with mutual benefits,**
- **Our top management is committed to providing all information and resources to achieve the goals and objectives within the scope of energy.**
